

Design collaboration shouldn't be extra work

Less files. More flow.

No more digging through Dropbox and Google Drive. Always know where to find "the latest," so you can stay in your design flow.

Design together, in real time.

Explore and iterate in the same file at the same time, without losing the original. Simply create a branch, do your thing, then merge your changes when ready.

Iterate with context.

Know who made changes, when, and why. Compare changes side by side, resolve design conflicts, and merge work with precision.

Happy Ring helps you learn the difference between healthy stress that aids in performance and toxic stress that wears you out.
